PERSONAL PROJECTS :

Country Informatics
- This Responsive Web Application made up of Async JavaScript, HTML5 and CSS3 that fetches the selected country's basic details and presents them to the user in readable cards format from an API.

Amazon Clone
- This project contains Amazon Home Page frontend clone where I used HTML5 and CSS3 deployed on Git hub.

Unit Convertor
- This website is created with HTML5 , CSS3 and JavaScript where we can convert units of: a) temperature : from Celsius into Fahrenheit, b) weight : from kilo-grams into pounds, c) distance : from kilo-meters into miles.

Git Hub Page Editing
- Edited my own Git Hub Home Page using Markdown Language so that viewers can check upon my other projects and contributions at ease.
